

BHEKINKOSI PRAISE MOYO

DATA SCIENTIST | MACHINE LEARNING & ANALYTICS

Gweru, Zimbabwe | 0787 459 664 / 0713 386 283 | bhekinkosipraisem@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Science and Informatics graduate with practical experience in data analysis, machine learning and business intelligence. Experienced using Python, SQL, Power BI and Excel to clean, analyze and visualize data, develop predictive models and build decision-support solutions. Completed professional experience in monitoring, evaluation and reporting, with additional hands-on projects in NLP, fraud detection and workforce analytics. Seeking graduate or entry-level opportunities in Data Science, Data Analytics, Business Intelligence or Machine Learning.

TECHNICAL SKILLS

Programming and Data Analysis: Python, SQL, R, Pandas, NumPy, Scikit-learn, Matplotlib

AI and Machine Learning: Classification, Regression, Predictive Modeling, Time Series Analysis, NLP, Deep Learning, Anomaly Detection

Data Engineering: ETL pipelines, data cleaning, data validation, feature engineering

Analytics and BI: Power BI, Excel, SPSS, Tableau and Statistical Analysis

Development & Deployment: Flask, REST APIs, Streamlit, Docker, Git and Cloud Deployment

Databases: MySQL, MS SQL Server and PostgreSQL

PROFESSIONAL EXPERIENCE

STRATEGIC INFORMATION & EVALUATION INTERN | Mar 2024 – Feb 2025

Zvandiri House — Harare

- Processed and analyzed large-scale program datasets using **Python** and **SQL** to support monitoring and evaluation of health outcomes.
- Designed data validation and cleaning pipelines that improved dataset accuracy and reduced reporting errors.
- Built automated **Excel** and **Power BI** dashboards to track KPIs for internal and donor reporting.
- Ran baseline and endline analyses that informed program decision-making for stakeholders.

SELECTED PROJECTS

BANKING SENTIMENT ANALYSIS ASSISTANT | FinBERT · Flask · NLP

- Developed a prototype banking sentiment analysis application using FinBERT and Flask to analyze customer messages.
- Implemented sentiment classification to categorize customer messages as positive, negative, or neutral.
- Built an interactive dashboard to visualize sentiment distribution, conversation records, and sentiment trends.

EMPLOYEE SKILL GAP ANALYSIS PLATFORM | Web Scraping · KNN

- Developed a machine learning prototype using K-Nearest Neighbors (KNN) to analyze skill requirements and identify potential skill gaps.
- Implemented web scraping to collect job-market data from platforms including Adzuna and VacancyMail.
- Generated data-driven insights on emerging skills and potential upskilling opportunities based on job-market requirements.

FRAUD & BEHAVIORAL ANALYTICS PLATFORM | Isolation Forest · Random Forest · LSTM

- Developed a prototype fraud detection system combining Isolation Forest, Random Forest and LSTM for transaction and behavioral analysis.
- Applied anomaly detection, classification and time-series modeling to identify suspicious transaction patterns.
- Evaluated the combined approach for detecting known and potentially novel fraudulent behavior.

EDUCATION

Bachelor of Commerce (Honours) in Data Science and Informatics | *Midlands State University, Zimbabwe*

- **First Class** | 2022 – 2025
- **Academic Scripts and portfolio:** [Portfolio](#)

CERTIFICATIONS

- Data Science and Informatics Certification
- AI Fundamentals Course
- Introduction to Machine Learning Course
- Data Analytics Essentials Course
- AWS Certification Course Course

CORE COMPETENCIES

Machine Learning · Predictive Modeling · Data Analytics · Deep Learning · Data Visualization · Business Intelligence · Software Development · ETL · SQL · Problem Solving

ADDITIONAL SKILLS

- Business requirements interpretation, system prototyping, user feedback incorporation and documentation.
- AI workflows, reporting automation, process automation, and practical machine-learning model development.
- Research, data collection, data validation, dashboard design, and stakeholder communication.
- Cloud server setup, deployment support, application troubleshooting, and system maintenance.
