PROFESSIONAL PROFILE

Detail-oriented and analytical Data Science and Informatics graduate with strong skills in data analysis, visualization and statistical modeling. Experienced in transforming complex datasets into actionable insights using Python, SQL and Excel. Passionate about dashboard development, performance analytics and evidence-based decision-making. Proven ability to work in multidisciplinary teams and meet strict deadlines.

TECHNICAL SKILLS

Programming & Analysis:

Python (Pandas, NumPy, Matplotlib, Seaborn) and SQL

Data Visualization & Reporting:

Excel, Power BI, Google Forms, PowerPoint

Database & Tools:

PostgreSQL, MySQL, Microsoft Excel, Microsoft Word, Outlook

Statistical & Analytical Skills:

Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Dashboard Development and Report Writing

WORK EXPERIENCE

Strategic Information & Evaluation Intern

Zvandiri House – Avondale, Harare

March 2024 – February 2025

Major Responsibilities

- Collected, cleaned and validated program data to ensure accuracy and consistency.
 - Performed statistical analysis to support monitoring and evaluation activities.
 - Developed summary reports and data visualizations for stakeholders.
 - Assisted in preparing analytical presentations for management and partners.
 - Supported data-driven decision-making through timely reporting.
-

ACADEMIC QUALIFICATIONS

Bachelor of Commerce in Data Science and Informatics

Midlands State University – Gweru

2022 – 2025

Advanced Level

Njelele High School

Three passes including Statistics, Economics, and Business Enterprise

2019 – 2020

Ordinary Level

Cheziya Gokwe High School

Seven passes including Mathematics, English and Combined Science

2015 – 2018

ACADEMIC & PRACTICAL PROJECTS

1. Data Analysis and Visualization Project

- Analyzed structured datasets using Python and Excel.
- Conducted exploratory data analysis to identify trends and patterns.
- Developed visual dashboards to present key insights.

2. Statistical Modeling Project

- Applied regression and classification techniques.

- Evaluated model performance using appropriate metrics.
 - Presented findings in a structured analytical report.
-

SOFT SKILLS

- Strong analytical and problem-solving skills
 - Excellent written and verbal communication skills
 - Detail-oriented and highly organized
 - Team player with adaptability to change
 - Reliable and deadline-driven
